## Call from the grounds of North and East Syria to the peoples of the world: **Defend the women revolution of Rojava!**

In this days our revolution of Rojava- North and East Syria is standing like a rock against the storm under the threat of uprising political islamic-fascist patriarchal gangs and states. As peoples living in the heart of the Middle East we are fighting and resisting at the front, in the trenches of war, in the cities, villages and at border duties to defend the democratic revolution and the women revolution of our grounds. We are not scared of the attacks of the political islamic-fascist states and gangs. We don't know the meaning of fear. Even if it's raining bombs down on us, we will never stop to defend our positions, our trenches, our villages, cities and grounds.

### **Islamic-fascist gangs are ruling Syria**

Nearly two months ago Hayat Tahrir al-Sham did overthrow the murderous colonist Assad regime and got into power of the bourgeois state of Syria. The political islamic gang HTS, which has grown strong relying on the support of imperialist states and regional regressive states like Turkey and Israel, is putting on a democracy mask to consolidate its position. Ahmed al-Shara alias Abu Muhammad al-Jawlani, who came 2012 to Syria with the mission to build up the Syrian branch of the Islamic State, is trying to fool the peoples of Syria and the world with talks about democracy, women rights and freedom. He makes the sharia judge Shadi al-Veysi, who is known for publicly punishing women with death with reason of "fornication", sit on a "Justice Minister" chair. He is filling the positions of the government with his old Islamic State friends.

While the HTS is playing a tragicomedy theater on the government stage, we can watch the tortures and massacres its committing. We see the HTS encircling families of Alawit confession in their houses, burning them together with their children. We see the HTS violating women and girls, kidnapping children and using torture methods like electricity and pulling out fingernails. We also were witnesses of HTS distributing Sharia clothes to women. At the same time we listened to the Office for Women Issues of the HTS government, propagating the "great women politics of AKP".

### **Political Islamic-fascist gangs are attacking the Rojava-Revolution**

In the north of Syria the Turkish political islamic-fascist state, while being in alliance with the gangs of HTS, attacks the grounds of Rojava and our democratic self-administration in the north of Syria, making use of its political islamic-fascist gangs, who are carrying the name "Syrian National Army". While the HTS was taking over the government in Damascus, the political islamic gangs of the Turkish state started an occupation war against the regions Til Rifat and Shehba. Hundreds of thousands of refugees once again had to flee from the places they had found refuge. By occupying Minbiç and crossing the Euphrates, the fascist Turkish state is trying to realize its dream of occupying Kobanê. At the same time it lets bombs rain on the region extending 30 km until the M4 road, which it could not occupy in 2019.

### **The revolutionary resistance of the united peoples is unbreakable**

But the fascist patriarchal Turkish state and its gangs are not able to break the resistance of our revolutionary peoples. For weeks they could not progress in Qereqozak region and at the dam of Tîşrîn. They don't manage to pass from Minbiç to the eastern side of the Euphrates where also Kobanê is located. In Qereqozak and Tîşrîn the gangs of the Turkish state are confronted with the steely resistance of our military SDF forces. While we are coming with thousands of Kurdish, Arab, Assyrian, Syriac, Yazid, Turkmen, Armenian revolutionary hearts from all parts of the grounds of our self-administration to create a Living Shield against the occupation attacks of the patriarchal political islamic-fascist gangs, the Turkish state is throwing bombs on us. But our peoples, while on one hand picking up the dead bodies of our fallen comrades, on the other hand go on walking shouting "Long live the resistance of SDF". Even under a rain of bombs our peoples don't stop dancing "halay" while forming a Living Shield at the dam of Tîşrîn. They give to the world an example of the power of fearless self-sacrifice resistance of united peoples.

### **Every place is a part of the resistance**

In every place of Rojava our peoples are taking place in this revolutionary peoples war. While at the border line the professional military forces of SDF are keeping their positions, in the cities and villages the peoples are creating new battalions, armed forces of the revolutionary peoples war are organized. Against the probability of attacks by political islamic gangs, who are hiding themselves inside the regions of the revolutionary self-administration, the peoples self defense units are guarding the streets and houses. In the neighborhoods people are collecting goods and sharing their properties to cover the needs of the refugees coming from the war zones. Mothers are preparing tons of food to sent it to those fighting at the front. Thousands of people at the northern side of Kurdistan are taking duty at the border against the threat, that the Turkish state will carry out also ground attacks against places like Qamişlo, which are located close to the border.

### **Call to the peoples of the world: Be a part of our resistance!**

As Revolutionary Communist Women (Jinên Komunîst ên Şoreşger/JKŞ), we are participating in the most fore front lines of the resistance and are defending the women revolution of Rojava. We are calling the peoples of the world: Become a part of our resistance! Defend the women revolution of Rojava! Become a part of the revolutionary peoples war!

With the support of the imperialist forces, sitting at the top of the NATO, political islamic-fascist states and gangs build up their women hostile powers in the Middle East. In the middle of this patriarchal darkness, our revolution of Rojava- North and East Syria is standing firm like a rock holding up the light of the women revolution.

If you come here to stand with us shoulder on shoulder or if you strengthen the fight in the place where you are: Let's turn every place and every heart in a space of our resistance. Expose the lies of the imperialist states. Don't permit the states of the regions, where you live, to support the political islamic-fascist forces, who are attacking the Rojava revolution. Don't leave no comfortable save areas to those, who fan the flames of political islamic-fascism, while keeping themselves in the background. Defend the Rojava revolution, which is the light of hope to the womens freedom fight in the world. Become sparks of the women revolution of Rojava. Rise up the light of the women revolution of Rojava where ever you are.

**Long live the revolutionary resistance!**

**Long live the sisterhood of the peoples!**

**Long live the women revolution of Rojava!**
